Libraries & Frameworks | Angular | React | Next.js | SvelteKit | NodeJS | Tailwind CSS | Spring Boot | Electron | Strapi | Anime.js | Motion One | Prisma | Mapbox
Tools & Platforms | Git | Github | Netlify | Vercel | Jenkins | Openshift | Heroku | AWS | RabbitMQ | Kafka | Docker | Kibana | Jetbrains | VS Code | Webflow | Figma
Italian, English, French - *All professional proficiency*

Experience

Accenture | Senior Developer   Milan, Italy | 10.2018 - Current

- Used Typescript with Angular and Svelte to develop, style and ship high-quality websites for some of the most important banks in the European market
- Developed and maintained a scalable micro service-based application consisting of over 40 services using Spring Boot, to process thousands of daily requests across 400+ bank branches
- Enabled banks to achieve compliance with new GDPR regulations by building internal tools such as a data deletion systems and treatment registers, to improve data security, retention and anonymization practices
- Established and enforced best practices across development lifecycle to enhance code quality and productivity
- Optimized and refactored code, reducing project's execution time by over 70% by simplifying SQL queries, consolidating database tables, and parallelizing processes using threads
- Performed quality assurance tests on various sites to ensure cross-browser compatibility and mobile responsiveness
- Implemented user access controls to safeguard sensitive data and maintain compliance standards
- Engaged actively in mentoring team members through close collaboration, to promote a collaborative and learning-oriented environment

Education

University of Turin | Bachelor's Degree   Turin, Italy | 2015 - 2019
Bachelor of Science in Computer Science

Certifications

Amazon Web Server | AWS Certified Cloud Practitioner   2021 & 2024

Projects

Di Barrò | Winery Website
Vierin | Dental Website

- Developed responsive and visually appealing static websites using SvelteKit
- Implemented SEO best practices to enhance the website's visibility and ranking on search engines

Alpitude | Sport Outdoor Website

- Collaborated closely with a designer to establish a visually appealing design system and a cohesive user experience across the application
- Built the backend in Node.js through Strapi and GraphQL to manage content efficiently and maintain optimal performances
- Deployed the application on the AWS infrastructure to ensure security, scalability and reliability
